

# LIFETIME LEAK-FREE WARRANTY

## Coverage

*Russell & Sun Solar Corporation warrants the roof penetrations associated with the installation of your solar heating or solar electric system to be free from leaks for the life of the system. If a leak develops at a penetration made during the original installation, Russell & Sun Solar will make the necessary repairs to the roof at no cost to the customer, provided the claim is made in a timely manner.*

## What is not Covered

*This warranty does not apply to conditions resulting from abuse, misuse, neglect, accident or damage caused by extraordinary abnormal weather conditions or acts of God. This warranty does not apply to conditions resulting from attempts at repair or alterations by anyone other than a person authorized by Russell & Sun Solar Corporation to do such repairs or alterations.*

## Other Conditions

*If a named storm has hit Brevard or surrounding counties, an inspection of the roof will have to be performed by a Russell & Sun Solar authorized technician to keep this warranty in effect. The expense of this inspection will be the responsibility of the homeowner. If a claim of a penetration leak is made and found not to be from the "solar system" penetration(s), the customer will be responsible for a service call and labor charges.*
