

Two Year Power Production Warranty for PV Systems

Coverage

Russell & Sun Solar Corporation warrants that for the first two years of operation your solar electric (PV) system will produce at least the minimum amount of power stated on your final invoice, or we will buy the difference for you.

More specifically...

The amount of power generated by the PV system will be determined by the data collected by the inverter and displayed on the front panel. Power generation will be expressed in kWh.

The rate per kWh will be determined with the following formula:

average previous 24 months electric bills, less administrative costs

divided by

the average per-month kWh usage

equals

per kWh rate, expressed in \$/kWh.

multiply the shortage of stated production goal by the per kWh rate

What is not Covered

This warranty will be void if factors beyond the control of Russell & Sun Solar Corporation have had a detrimental affect on system performance. Any repairs, alterations, attempts at repair, dismounting or moving of components, or other restricted activities, whether the fault of the owner or not, will void this warranty. These activities include, but are not limited to:

- expanding/growing vegetation*
- unpredictable shading*
- building additions*
- unreported system downtime*
- moving the system*
- unreported system problems*
